

LUCA PORCARO

Luca Porcaro is business analyst at Mar.Te. S.c.ar.l. He graduated from the University of Naples “Parthenope” with a bachelor's degree in Nautical Sciences, specializing in Navigation, with a research thesis on the analysis of methodologies used for the weight and balance of a commercial airplane. During his studies he acquired knowledge in Navigation, Radar and Radio aids to navigation and aeronautical Telecommunication.

He continued his studies by attending a training course for professionals specialized in the design of cognitive systems for the monitoring and control of vessel traffic.

In addition, he consolidated the knowledge acquired by doing a period of internship at the Grimaldi Group where he dealt with research topics related to ICT systems and technologies to support the physical and logical infrastructure of shipping and port and inland port logistics.
